# anglia china

**Anglia China is an electronic component logistics and distribution operation with headquarters based in Hong Kong.**

**Anglia Components, one of Europe's leading independent distributors of semiconductors, optoelectronics, interconnect, passive and electromechanical components, has made a substantial investment in establishing Anglia China as part of its distribution network with the aim of supporting strategic UK customers as they upgrade their global manufacturing capabilities in China.**

Anglia China's Logistics facility in Hong Kong.

Anglia Components has experience of doing business in China since the 1980's, with joint ventures with some of our own brand component factories, including Nover Capacitors, Eurohm Resistors and Taicom Connectors.

When a customer makes the decision to migrate some or all of their manufacturing to Asia, we are able to remove many concerns regarding the quality, continuity of supply and protection of IP by working closely with OEM's and their EMS partners to offer a seamless migration path, coupled with global price support ensuring continuity is maintained.

We combine this with ongoing UK based engineering support to help our customers develop their next generation of products and continue the supply chain cycle.

Anglia China's operation is focused around inventory management, supply chain and logistics support to ensure customer's production is never compromised. Anglia China has a 15,000sqft logistics hub located in Hong Kong to supply our OEM and EMS partners with a full range of component and system needs. This facility has been in operation since 2005, during which time we have become an integral part of our customers' synchronized supply chains.

## Corporate Social Responsibility Statement

Anglia is committed to taking our Corporate and Social Responsibility (CSR) seriously at all times, and fully recognise our responsibilities towards our employees, suppliers, customers, the environment and the communities we all operate in.

# Your Complete Supply Chain Package

Anglia China delivers a valuable and synchronized service to many of our authorized suppliers providing essential support and full traceability during the migration of UK designs to mass production of the end product in Asia. Anglia's process ensures complete transparency at all levels enabling us to provide continued support for existing and next generation designs.

Anglia China offer a comprehensive and competitive service to our OEM customers and EMS partners. This includes total supply chain management, streamlined logistics support and DDP Hong Kong deliveries. We back this up with significant investments in inventory and dedicated customer safety buffers held in our Hong Kong and UK logistics hubs.

The Anglia China service combines global commercial support pricing along with sophisticated inventory management programs.

We are able to offer our partner OEM and EMS customers, competitive supply chain management, comprehensive logistics support and free of charge deliveries.

**Claire Joyce**, VP Sales – Asia Pacific, Anglia China

## Dedicated logistics facility in Hong Kong providing:

- DDP Hong Kong Incoterms
- Local buffer stockholding in Hong Kong, supported by UK inventory
- Shipments direct to Hong Kong from our suppliers – minimising carbon footprint
- Credit Terms (Subject to status)
- Synchronized technical and design support for OEM and EMS partners in the UK and Asia
- Multi-site manufacturing support with global support pricing
- Dedicated team supporting OEM and EMS partners across the UK and Asia. Offering global price negotiation, order-book, forecast and inventory management services.
- EMS recommendation & partnership programme
